Open Autodesk Autocad Create new project with default options. Install Autodesk Autocad to the same location as where you have the keygen. Open Keygen file in Notepad. In this case I have open without problem the only.pfx (private file) Paste your key to the OpenKeys.txt file. Click the Open button, it will open Autocad. You will have to register with Autocad. Open System Setting Click the Install button. It will start to install Autocad. It will ask you to accept license agreement. Click the I accept button. It will open the license screen. Click the Install button. It will start to install Autocad. It will show you the path where Autocad is installed. In my case it is C:\Program Files\Autodesk\Autocad 2016\ACAD_2016 In the configuration file of Autocad is called config.ini. Inside of this config.ini, you can find the settings you have already done, for example, your version. For example I have this setting: Version=15.0 Hope it helps. [Blood conservation in the surgical treatment of patients with benign thoracic and cardiovascular disease]. Blood conservation in the surgical treatment of patients with benign thoracic and cardiovascular disease is discussed. It is based on new principles and methods. In consideration of their importance the article gives an overall picture of this process. The questions which are discussed are as follows: What is the significance of the blood conservation, what the agents are, the methods and their efficacy, the indications for their application. The blood conservation is also of considerable importance in the therapeutic process.Q: Transform SVG object to canvas How can I transform an SVG object into canvas? I've tried to: 1) get the data uri of the SVG \$url = \$this->getUrl('system/config/media/svg/custom_template/bundles/bundle/svg/animation.svg'); \$data = \$this->getRequest()->get('data'); 2) transform the url into data uri \$data = str_replace('data:image/svg+xml,', '', \$url); 2) transform the data uri into canvas \$
