CoffeeCup Free FTP Crack+ [Win/Mac]

CoffeeCup Free FTP is a small, easy-to-use, program that helps you easily maintain your websites using FTP. You can use the Explorer-based folder structure to easily navigate directories on your computer and select items to upload. Once you have connected to a server, you can use the editor for inserting and executing standard commands quickly and with reduced effort, as well as switch to image viewing mode. CoffeeCup Free FTP supports many web design languages, namely HTML, CSS, JavaScript, XML, PHP, Ruby, Perl, Python, C++, HTML 4.01, HTML 5, XHTML 1 and CSS 3. Files and folders can be uploaded and downloaded from the server in just a matter of clicks, while transfers are monitored in a separate panel. It is possible to set bookmarks (locally, remotely, or a combination of both), switch to FTP or edit view only, as well as manage a list of multiple servers. Other options of CoffeeCup Free FTP let you use a search function, set the transfer mode to ASCII or binary, edit file permissions, make the app transfer files when double-clicking remote, local ones, or both, as well as edit proxy parameters and customize colors for syntax highlighting in editor mode, among others. CoffeeCup Free FTP is light on the system resources, using a minimum quantity of CPU and RAM. It has a good response time, provides a good transfer speed, and includes a complete documentation for less experienced users. Thanks to its intuitive layout and standard options, CoffeeCup Free FTP should please all users who are looking for a simple FTP website editor.
