Computer Proficiency Testing

KEYMACRO, is a computer based quiz which provides all the basic Computer concepts to the candidate. Each question has one or more answers. You can choose the right answer among the given answers by simply pointing at the right box. Keymacro is an online quiz with good scoring system. It provides you with the explanation for the right answer and a correct/incorrect result. Some of the available features are: - Submit your answers online and get result in few minutes. - Choose your difficulty level. (Easy, Medium, Hard) - Earn badges for your profile by scoring over 95%. -

You can choose your career as a programmer, data base manager, software or web development. - No Internet security is a key factor in maintaining the security of your PC. Numerous security solutions are available to protect your PC from malware, spam, malicious websites and others. In this article, we will cover some of the security solutions that can be used to protect your PC from malware and other threats. Win8 and Win8.1 users, need to be especially careful. Microsoft has locked the developers from using third-party security software unless those security programs are signed by Microsoft. Once you have installed third-party security software, it cannot be uninstalled unless you uninstall all the software. Windows 8.1 users don't need to worry about this because they have the ability to turn off Windows Defender for security purposes. Security Programs Here are some of the free antivirus and antimalware programs available

for Windows 8, Windows 8.1 and Windows 10: AVG Kaspersky Bitdefender Microsoft Security Essentials We recommend that you avoid the use of Windows defender, because it has many inherent flaws. Anti-malware: Anti-malware can be used to identify malware and remove it from your PC. Anti-malware programs are available in two categories: Windows only Windows and Mac Windows only: If you are using a PC running Windows, we recommend you use Microsoft Security Essentials (MSE). Windows Defender and Security Essentials are free and available for download from Microsoft. Windows and Mac: If you are using a Mac, you can use avast or a Kaspersky antivirus program. Note that Kaspersky is available for Windows, Mac, iOS and Android. Avast is a free anti-malware program that can be used for both Mac and Windows. Anti-spyware: 77a5ca646e

01-Create Java application. 02-Set properties for the test to be administered. 03-Set properties for the results to be displayed. 04-Design a user interface. 05-Run the test. 06-View the result. == How To Play == * Load the JAR file into your preferred Java virtual machine and run the main program. * Enter the number of questions to be tested in the box provided. * The application will evaluate your computer skills and will ask you questions to test your knowledge. * You can view the results at any time. * To view the current score, simply click on the Score box and a summary of your results will be displayed in a table. * To increase the difficulty level, click on the + button.
