Rinzo XML Editor is an XML editor that can read and write XML documents. The design of the editor is similar to that of a standard text

editor such as Notepad. The primary window consists of a document window and an XML navigator. Documents are stored in the Document tree and read from the navigator. If the document is updated, it is written to the navigator. The XML navigator can display and edit document trees. It can also be used to add, remove, or navigate the document tree. There is also an XML editor window, which consists of a text editor and a view of the document tree. There is also a help window that shows a list of the document tree's commands. The primary window's toolbar contains a menu with three sets of commands. The first set is used to navigate the document tree. The second set contains commands to create and edit documents. The third set contains commands to convert data from and to XML. The XML navigator's toolbar contains a menu with the same set of commands. The menu items that correspond to the primary window's commands

are highlighted with blue backgrounds. The XML navigator's view can be configured to show the document tree in a tree or list view. The document tree can be collapsed, and it can be displayed in either the simple or complex format. The editor window also has a menu with the same set of commands. The menu items that correspond to the navigator's commands are highlighted with blue backgrounds. It also has a few context-sensitive menu items, which are highlighted with yellow backgrounds.
